RE: **Léopold Delisle v. Attorney General of Canada & al.**
714X - Class action

Dear «Titre_»:

We have been authorized by the Federal Court to advise doctors who have prescribed 714X in the past, of the approval of an agreement entered into with Health Canada in the class action that opposed it to patients having used or who wanted to use 714X through the Special Access Program (SAP).

The notice of agreement, attached hereto, essentially aims to confirm that 714X is available through the SAP on compassionate and humanitarian grounds, as was recognized by the Court.

You are therefore invited to take cognizance of this agreement for the benefit of the patients concerned by the class action.

Also, if you or one of your patients should encounter problems in the future in obtaining 714X, we invite you to communicate with Mr. Léopold Delisle, the director of the National Coalition for 714X, who will insure that the agreement is respected. To contact Mr. Delisle: www.coalition-nationale-714x.com

We pray that you receive, dear doctor, our most sincere regards.
