Dear Mr. Michaud,

Re: Pending legal actions BIE Health Products Inc. v. Her Majesty the Queen in the Right of Canada (Health Canada and the Canadian Border Security Agency)

In reference to our recent telephone discussion, the following is the first of a series of queries that our firm requires assistance with. Thank you very much for the verbal information provided in our discussion. Our client's FDA approved food supplement's Canadian advertising has been stopped in Canada with federal regulators citing the authority as identified herein. The federal regulators have actively contacted our client's suppliers, clients, and destroyed our client's business in a systemic, premeditated manner!

Attached is Exhibit A which we believe indicates that after passage of the *Canadian Bill of Rights S.C. 1960, c. 44 - An Act for the Recognition and Protect of Human Rights and Fundamental Freedoms assented to 10th August 1960* your committee or its predecessor was required to scrutinize all existing federal legislation and regulations made pursuant to federal legislation to ensure compliance as specified.

Our clients in this matter are disputing enforceable federal authority under Section 3.1, 3.2 and Schedule A of the *Food and Drugs Act [more properly referred to as the Adulteration and Fraud Act]*.

These referenced sections were created by an amendment in 1934 to the *1884 Adulteration of Food and Drugs Act S.C. c. 34 assented to 19th April 1884*, which according to our research is the original consolidation of federal legislation in these matters [see Exhibit B].

Our legal team last year for another client successfully challenged 60 criminal charges against three different legal entities claiming to have authority under these same referenced sections of the *Adulteration of Food and Drugs Act S.C. c. 34* as amended to date. Prior to these 60 criminal charges being laid in

Helping you with your legal and government issues is our specialty!

January 2003, our firm, on behalf of several clients had provided in a mid 2002 meeting detailed case law and legislative references to Heather Watson on behalf of the then Minister of Health, representatives from the Deputy Minister of Health' office, the Department of Justice, and Dr. Phillip Waddington, Director-General of the new Natural Health Products Directorate, as well as several others. Our firm has been trying for several years to stop federal regulators destroying small Canadian businesses.

One of our clients – the Strauss Herb Company in disclosures recently received the confidential memo marked Exhibit C. Examination of this internal Ministerial briefing document clearly supports our contention that Sections 3.1, 3.2 and Schedule A violates our client's rights of freedom of speech and cannot be saved based upon a grave national Peace, Order and Good Government argument that would justify criminal charges. It also refers to a detailed legal opinion that your committee could access.

Has your committee from the 1960 passage of the *Canadian Bill of Rights S.C. 1960, c. 44, An Act for the Recognition and Protect of Human Rights and Fundamental Freedoms* thoroughly reviewed this specific federal censorship issue in the existing *Adulteration of Food and Drugs Act S.C. c. 34 assented to 19th April, 1884* and as amended to date and the related regulations, policies, and enforcement activities?

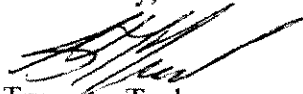

If no, please request an immediate review and witness days for our client and others, if yes, please forward copies of all associated documentation.

Other than a lawsuit, your committee is our last hope, as for years our clients, including consumers, natural health businesses, and consumer organizations cannot obtain any assistance or even response to our documented written complaints from either the federal departments, Ministers involved, nor Prime Minister to stop Public Servants depriving our clients of their most basic rights as laid out in the *Canadian Bill of Rights S.C., 1960 c.44* section 1(a) "the right of the individual to life, liberty, security of the person and enjoyment of property, and the right not to be deprived thereof except by due process." [Exhibit A], likewise, section 7 of the Canadian Charter of Rights and Freedoms which states that "Everyone has the right to life, liberty and security of the person and the right not to be deprived thereof except in accordance with the principles of fundamental justice", and as protected by the primacy clause of the *Constitution Act 1982, section 52*, making it the "supreme law of Canada, and any law that is inconsistent with the provisions of the Constitution is, to the extent of the inconsistency, of no force or effect".

There is an urgency to this, as daily enforcement by junior level Health Canada regulatory officials is still occurring to hundreds of businesses nationally, and deaths are being caused because the truth about the effective options that nutrient-rich, food-based medicines provide in the prevention and treatment of most modern day chronic diseases is being repressed by federal government censorship activities claiming enforceable criminal power federal authority under these referenced legislative sections and the related regulations and enforcement activities. These federal regulatory agencies include Health Canada, Canadian Food Inspection Agency, C.R.T.C., Advertising Bureau and others.

Your immediate written acknowledgement of receipt of this plea for assistance and confirmation of the next step is respectfully requested.

Yours truly,

Trueman Tuck

Legal & Political Rights Advocate
